Northwest Hazelnut Inc.

Northwest uses locally grown energy to offset 100% of its annual kWh usage. This company utilized depreciation, the ITC and a state rebate to earn a 5.5 year ROI!

- 435 kW Solar project
- 1000 SP E-435W panels are set to offset 22 million pounds of CO2 over the next 25 years
- Over $1.7 million in cumulative electrical savings over the next 25 years.
Barenbrug USA - Tangent, OR

- 648 SP P-350W panels
- Over $678,000 in cumulative electrical savings over the next 25 years.
Kuenzi Turf & Nursery - Salem, OR

80 kW Solar project

• 182 SP E-435W panels
• Over $270,000 in cumulative electrical savings over the next 25 years.
Taylor Farms - Silverton, OR

- 216 SP X-360W panels
- Over $336,000 in cumulative electrical savings over the next 25 years.
- REAP & RED Grant
SOLAR INCENTIVES

Federal Income Tax Credit
This credit can be used by property owners throughout the United States.

Energy Trust of Oregon
Commercial rebate from Portland General Electric and Pacific Power. First come, first serve.

MACRS Bonus Depreciation
Modified Accelerated Cost Recovery System is for solar products utilizing the ITC. Depreciate the total project cost minus one half of the ITC.

REAP & RED Grant
These are competitive grants that can be applied to AG systems.
